

Environmental Policy

At **Ajax Domestic Spares**, we are dedicated to protecting the environment and actively contributing to the sustainable future of our community and planet. We understand the importance of reducing our environmental impact and are committed to integrating environmental responsibility into all aspects of our business operations.

1. Waste Reduction

We are committed to reducing the amount of waste we generate in our operations. We aim to achieve this by promoting recycling and reusing materials where possible, and minimizing the use of single-use plastics. Additionally, we strive to reduce paper consumption through digital documentation and communication.

2. Energy Efficiency

We will reduce energy consumption across all our facilities by implementing energy-efficient technologies, such as LED lighting, energy-saving equipment, and sustainable heating and cooling systems. Our aim is to continuously improve our energy management practices to lower our carbon footprint.

3. Sustainable Sourcing

We recognise the importance of sourcing products and materials that have been responsibly produced. Where possible, we will prioritise the procurement of renewable, recyclable, and biodegradable products. We are committed to working with suppliers who share our commitment to sustainability and who adhere to environmental best practices.

4. Carbon Footprint Reduction

We are working to reduce our carbon footprint by implementing measures such as reducing business travel, promoting remote working, and encouraging the use of eco-friendly transport options. We also seek to reduce emissions through efficient supply chain management and product transportation.

5. Water Conservation

We are dedicated to reducing water consumption in all areas of our business. We will implement water-saving initiatives, such as installing water-efficient fixtures, and will encourage our employees to adopt water conservation practices.

6. Environmental Education and Awareness

We believe that fostering awareness of environmental issues among our employees, customers, and partners is crucial. We will provide resources and training to promote sustainability, and encourage our team to contribute to our environmental goals both at work and in their personal lives.

7. Continuous Improvement

We are committed to continually reviewing and improving our environmental practices. We will regularly assess our environmental impact, set measurable targets, and strive to achieve the highest standards of sustainability.

This will include reviewing our operations and adjusting practices as new environmental challenges and opportunities arise.

Our Approach

To implement these commitments, **Ajax Domestic Spares** will:

- Follow UK environmental regulations and comply with all relevant legislation, including the Environmental Protection Act 1990, the Waste Electrical and Electronic Equipment (WEEE) Regulations, and other applicable laws.
- Regularly monitor and report on our environmental performance to ensure we meet our sustainability objectives.
- Promote environmental awareness and engage our employees in sustainability initiatives.
- Encourage the use of sustainable transport options and reduce our reliance on fossil fuels in line with the UK Government's net-zero carbon emissions targets for 2050.
- Work closely with suppliers and customers to ensure that environmental responsibility is at the core of our operations.

Conclusion

At **Ajax Domestic Spares**, we believe that sustainable business practices are essential for the well-being of future generations. We are committed to reducing our environmental impact, ensuring compliance with UK environmental laws, and actively contributing to the ongoing improvement of our environmental performance. Together, we can create a cleaner, greener future for all.
